

# ECM UI ANALYSIS

We don't know what we are logging in to.

Forget Password link?

The gradient could be taken out since it is a little outdated style.

A screenshot of a web application's login page, titled "ECM UI ANALYSIS". The page features a dark blue header bar with the "e AGENT™" logo on the left and a user profile "HHAMANO" with a dropdown arrow on the right. Below the header, the login form is centered. It includes a "Username" label above a text input field containing "hhamano". Below that is a "Password" label above a password input field with masked characters ".....". A "Submit" button is positioned below the password field. A "Forget Password link?" is located above the password field. Three green callout boxes with lines pointing to specific elements contain analysis notes: "We don't know what we are logging in to." points to the logo; "Forget Password link?" points to the link text; and "The gradient could be taken out since it is a little outdated style." points to the "Submit" button.

Not enough color contrast  
Suggested color: #51B7E6

Not enough color contrast

No need for this slash when there is only one page.

Those two buttons are placed too close to each other. We could put them in rectangular buttons instead of just having the texts.

Notice how the left and right margins have different widths. Search bar and the Add Agency button should be a little shorter so the widths of the right margins become the same as the left ones.

The gradient could be taken out since it is a little outdated style.

Necessary?

For consistency, if we don't have an option of "View All" under TACs, we shouldn't have the option of "View All" under Users. OR we can have "View All" under both.

These are clickable, but nothing happens.
